

LA JOLLA FD 8 ALFALFA

Delivers consistency in the desert!

La Jolla resists “Summer Slump” more than traditional varieties. When other varieties decline in late summer months, La Jolla performs better. As stands age, La Jolla shows extra strength and added persistence. Multiple pest resistance and tolerance to saline soils make La Jolla a great choice for your farm. Recommended by some to the Southwest’s leading hay producers, La Jolla was the highest yielding variety in the 2004 University of California, Imperial Valley alfalfa yield trial.

**#1 Highest Yield
UC Imperial 2004
Yield Trial**

**Resists Summer
Slump**

**Persistent in heavy
clay soils**

**Yields at the
top of the pack, year
after year**
